International Conference of Asian Political Parties

Statement on the Earthquake in Nepal by the ICAPP Standing Committee
(April 26th, 2015)

The Standing Committee Members of the ICAPP (International Conference of Asian Political Parties) extend their deepest sympathy and condolences to the people and the government of Nepal on the loss of lives and properties, including historic buildings, caused by yesterday's powerful earthquake.

We are also greatly saddened and concerned about the serious damages that have occurred in the adjoining areas of Bangladesh, China and India.

We urge the international community to provide prompt and necessary assistance to the people and authorities in the affected region, so that they may overcome the immediate difficulties.

The ICAPP will also coordinate efforts with all the political parties in the region for timely and adequate assistance through the ICAPP Program for Disasters Assistance (IPDA), which was launched in March of this year.
